

NATIONAL SAFE SKIES ALLIANCE

Program for Applied Research in Airport Security

PARAS 0062 Request for Proposals

Project Title:	Mitigating Impacts to Airport Security and Operations from Locally Hosted Major Events
Program Officer:	Jessica Grizzle 865-738-2080 Jessica.Grizzle@sskies.org
Fiscal Year:	2024
Contract Time:	12 Months
Funding Cap:	\$200,000
RFP Close Date:	May 10, 2024
Authorization to Begin Work (estimated):	July 2024

BACKGROUND

When a city hosts a major event, such as a national sports championship, a nationally significant conference, or other mass gathering, many attendees travel to and from the event via surrounding airports. This often results in a significant increase in commercial and general aviation traffic, which can have far-reaching operational and security impacts. These events can also have an impact on the overall level of security at the airport, as security resources must be reallocated to manage the disruption rather than conducting their normal duties.

Additionally, factors such as frequency of occurrence, amount of advance notice, and security ratings (e.g., National Special Security Events and DHS-designated special events) contribute to event complexity. Thorough planning is essential to successfully assess and mitigate impacts of major events on airport security and operations.

OBJECTIVE

The objective of the research is to create comprehensive guidance to help airports mitigate the impacts of locally hosted major events. At a minimum, the guidance should address:

- Overview of event types
- Pre-planning considerations, including establishing a knowledge base
- Planning process, including essential steps, decision points, and command structure
- Assessing event scope and potential areas of impact
- Stakeholder coordination, including roles and responsibilities
- Strategies to mitigate areas of impact
- Contingency considerations during events
- Post-event evaluation and improvement planning
- Leveraging available technology
- Relevant templates, checklists, and sample language
- Example scenarios for tabletop exercises

The resulting guidance should be applicable to airports of all sizes.

SPECIAL NOTES

- The scope of this research should focus on events that impact airport security and operations but occur off-airport in surrounding cities. On-airport and aeronautical events should be excluded.
- The text of the final deliverable is expected to be publication ready when it is submitted. It is strongly recommended that the research team include the expertise of a technical editor as early in the project timeline as possible. See Chapter 5 of the [Contractor Procedural Manual](#) for technical editing standards expected in final deliverables.
- Proposers should be aware of other related PARAS and ACRP projects, industry publications and white papers, research, and other relevant literature, documents, and initiatives, and include in the research plan their approach for considering these research efforts. Special attention should be paid to:
 - PARAS 0013: *Minimizing Congestion in Public Areas to Mitigate Security Vulnerabilities*
 - ACRP Synthesis 57: *Airport Response to Special Events*
- Targeted outreach and interviews can be utilized as part of this research effort. Broad airport surveys are not acceptable.
- Proposers are encouraged to ask questions regarding proposed scope and project panel intent. Questions should be directed to [Jessica Grizzle](#), PARAS Program Manager.

RESEARCH PLAN

PARAS is seeking the insights of proposers on how best to achieve the research objective, and is asking proposers to develop and include a detailed research plan. Proposers are expected to describe research plans that can realistically be accomplished within the constraints of available funds and contract time. Proposals must present the proposers' current thinking in sufficient detail to demonstrate their understanding of the issues and the soundness of their approach to meeting the research objective. The work proposed must be divided into tasks, and work for each task must be described in detail.

DELIVERABLES

The research plan should include the following interim deliverables for PARAS approval, at a minimum:

1. Amplified work plan
2. Literature review
3. Interim report that describes work performed in the early tasks, research results to date, an annotated outline of the anticipated final deliverable, and an updated work plan for remaining tasks
4. Draft final deliverable

Additionally, the research plan should build in appropriate checkpoints with the PARAS panel, including at a minimum:

- Kick-off teleconference meeting to be held within 1 month of the contract effective date
- One face-to-face interim deliverable review meeting
- Web-enabled teleconferences tied to the panel review and PARAS approval of other interim deliverables as deemed appropriate

The final deliverables will include the proposed guidance document and a Microsoft PowerPoint presentation that summarizes the project results, which will be used in presentations to the industry.

Note: The contract time includes 1 week for PARAS review of the amplified work plan, 2 weeks for PARAS review of the interim report, 1 month for PARAS review and comment of the draft final deliverables, and 1 month for contractor preparation of the final deliverables. For budgeting purposes, proposers should assume that PARAS will provide access to web-enabled teleconference services. Proposers should assume that the face-to-face interim deliverable review meeting will be held in the Washington, DC area.

PROPOSAL

The essential features required in a proposal for research are detailed in the current document entitled [Guidance for Preparing Proposals](#). Proposals must be prepared according to this document, and attention is directed specifically to Chapter 5 for mandatory requirements. **Proposals that do not conform to the mandatory requirements will be rejected.**

The total funds available are made known in this RFP, and line items of the budget will be examined to determine the reasonableness of the allocation of funds to the various tasks. **If the proposed total cost exceeds the funds available, the proposal will be rejected.**

All proposals become the property of National Safe Skies Alliance. Final disposition will be made according to the policies thereof, including the right to reject all proposals.

Proposals (1 PDF) are due not later than 4:00 p.m. EDT on May 10, 2024, and should be sent via email to Jessica.Grizzle@saskies.org. This is a firm deadline and extensions are not granted. In order to be considered for award, the electronic copy of the proposal, including the executed, unmodified Liability Statement must be received no later than the deadline shown, or the proposal will be rejected.

Proposal evaluation criteria can be found in Chapter 2, Section 2.4 of the [Guidance for Preparing Proposals](#).

LIABILITY STATEMENT

The signature of an authorized representative of the proposer is required on the unaltered [Liability Statement](#) in order for PARAS to accept the organization's proposal for consideration. **Proposals submitted without this executed and unaltered statement by the proposal deadline will be summarily rejected.** An executed, unaltered statement indicates the organization's intent and ability to execute a contract that includes the provisions in the statement.

GENERAL NOTES

- According to the provisions of 49 CFR § 21, which relates to nondiscrimination in federally assisted programs, all parties are hereby notified that the contract entered into pursuant to this announcement will be awarded without discrimination on the grounds of race, color, religion, sex, national origin, or disability.
- The contract type is cost reimbursement with a "not-to-exceed" limiting amount.
